Forward-Looking Disclaimer

The terms “Allied Properties”, “the REIT”, “we”, “us” and “our” in the following Management’s Discussion and Analysis of Results of Operations and Financial Condition (“MD&A”) refer to Allied Properties Real Estate Investment Trust and its consolidated financial position and results of operations for the quarter ended March 31, 2006. This MD&A should be read in conjunction with our consolidated financial statements and notes thereto for the quarter ended March 31, 2006, and for the year ended December 31, 2005. Historical results and percentage relationships contained in our consolidated financial statements and MD&A, including trends which might appear, should not be taken as indicative of our future results, operations or performance. Unless otherwise indicated, dollar amounts in this MD&A are in thousands.

Certain information included in this MD&A contains forward-looking statements within the meaning of applicable securities laws, including, among other things, statements concerning our objectives and our strategies to achieve those objectives, statements with respect to Management’s beliefs, plans, estimates and intentions and statements concerning anticipated future events, circumstances, expectations, results, operations or performance that are not historical facts. Forward-looking statements can be identified generally by the use of forward-looking terminology, such as “indicators”, “outlook”, “objective”, “may”, “will”, “expect”, “intend”, “estimate”, “anticipate”, “believe”, “should”, “plans”, “continue” or similar expressions suggesting future outcomes or events. Such forward-looking statements reflect Management’s current beliefs and are based on information currently available to Management.

The forward-looking statements in this MD&A are not guarantees of future results, operations or performance and are based on estimates and assumptions that are subject to risks and uncertainties, including those described below in this MD&A under “Risks and Uncertainties”, which could cause actual results, operations or performance to differ materially from the forward-looking statements in this MD&A. Those risks and uncertainties include risks associated with property ownership, geographic focus, asset-class focus, competition for real property investments, financing and interest rates, government regulations, environmental matters, construction liability and unitholder liability. Material assumptions that were made in formulating the forward-looking statements in this MD&A include the following: that the general economy remains stable; that the REIT’s current target markets remain stable; that interest rates and capitalization rates are stable; and that the equity and debt markets continue to provide access to capital. Although the forward-looking statements contained in this MD&A are based on what Management believes are reasonable assumptions, there can be no assurance that actual results, operations or performance will be consistent with these statements.

All forward-looking statements in this MD&A are qualified by this forward-looking disclaimer. These statements are made as of May 3, 2006, and, except as required by applicable law, we undertake no obligation to update publicly or revise any such statements to reflect new information or the occurrence of future events or circumstances.

May 3, 2006

Business Overview and Strategy

The REIT is an unincorporated closed-end real estate investment trust created pursuant to the Declaration of Trust dated October 25, 2002, as amended and restated on February 6, 2003 (“Declaration”). The REIT is governed by the laws of Ontario. The units of the REIT are publicly traded on the Toronto Stock Exchange under the symbol AP.UN. Additional information relating to the REIT is available on SEDAR at www.sedar.com.

The objectives of the REIT are to provide stable and growing cash distributions to its unitholders and to maximize unitholder value through the effective management and the accretive growth of its portfolio.

Property Portfolio

The REIT completed its Initial Public Offering (“IPO”) on February 20, 2003. The REIT used the net proceeds of the IPO to acquire a portfolio of 14 predominantly Class I office properties in downtown Toronto with approximately 820,000 square feet of gross leasable area (“GLA”). By the end of 2005, the REIT had acquired another 20 office properties in downtown Toronto, 19 of them Class I office properties, bringing its total GLA in that market to just under two million square feet. The REIT had also acquired two Class I office properties in downtown Montreal and one in downtown Winnipeg, bringing its total portfolio at the end of 2005 to 37 properties with 2.32 million square feet of GLA.

Class I office properties are created through the adaptive re-use of light industrial structures in urban areas. They typically feature high ceilings, abundant natural light, post and beam structural frames, exposed interior brick and hardwood floors. When restored and retrofitted to the standards of the REIT’s portfolio, Class I buildings can satisfy the needs of the most demanding office and retail tenants. When operated in the coordinated manner of REIT’s portfolio, these buildings become a vital part of the urban fabric and contribute meaningfully to a sense of community.

The REIT’s portfolio accommodates a diverse base of tenants. In 2005, business-service tenants represented 34% of the REIT’s gross revenue, retail tenants 20%, telecommunications and IT tenants 15%, media and entertainment tenants 13%, financial-service tenants 12%, government tenants 2% and other tenants 4%.

The REIT has become a leading provider of Class I office and ancillary retail space in Canada and intends to build on this advantage by continuing to make coherent office property acquisitions in its target markets. In doing so, the REIT will strive to enhance on an ongoing basis the quantity and quality of its net rental revenue.

Two of the properties acquired in 2005, QRC South (103 Richmond Street East, Toronto, formally referred to as 100 Lombard Street, Toronto), and 145 Berkeley Street, Toronto, are properties under development (“Properties Under Development” or “PUD”), in that they are undergoing the repositioning and redevelopment necessary for them to function as high quality, income-producing, Class I office properties. The costs related to Properties Under Development are comprised of acquisition costs and external and internal costs directly related to the repositioning and redevelopment, including administrative costs and carrying costs.

The REIT has an option agreement (“Option Agreement”) with Allied Canadian Development Corporation (“Developer”), a leading developer of Class I office properties, pursuant to which the Developer must offer to sell to the REIT at fair market value all developed or redeveloped office properties upon substantial completion. Three of the properties in the REIT’s portfolio were acquired pursuant to the Option Agreement.

The REIT’s portfolio has operated stably. The chart below summarizes the levels of GLA and leased area in the portfolio since the REIT’s IPO:

	IPO	Dec. 31, 2003	Dec. 31, 2004	Dec. 31, 2005	March 31, 2006
GLA (square feet)	820,120	984,856	1,636,343	2,321,507	2,321,507
% leased	96.9	97.5	99.2	97.0*	97.2*

*not including Properties Under Development

Stable portfolio operations and manageable growth in assets have enabled the REIT to achieve its overriding objective of providing regular and growing cash distributions to its unitholders. The chart below summarizes the annualized cash distribution level and the total annual return for each fiscal year since the REIT's IPO and for the quarter ended March 31, 2006:

	Dec. 31, 2003	Dec. 31, 2004	Dec. 31, 2005	March 31, 2006
Distribution level per unit annualized	\$1.10	\$1.14	\$1.18	\$1.22
Total return with reinvestment through DRIP	40.7%	17.6%	32.3%	12.9%
Total return without reinvestment	38.0%	16.2%	31.3%	12.7%

Property Management

Effective July 1, 2005, the REIT's wholly owned subsidiary, Allied Properties Management Limited Partnership ("Property Manager"), completed the acquisition of the property management business of the Developer. In addition to providing property management and related services in connection with the REIT's portfolio, the Property Manager provides property management and related services to third-party property owners on a fee-for-service basis.

Performance Indicators

The REIT measures the long-term success of its strategies through key financial and operating performance indicators.

Financial Indicators

1. Distributions

The REIT is focused on increasing distributions to its unitholders on a regular and prudent basis. During its first 12 months of operations, the REIT made regular monthly distributions of \$1.10 per unit on an annualized basis. In March of 2004, the REIT increased its monthly distributions by 3.6% to \$1.14 per unit on an annualized basis. In March of 2005, the REIT increased its monthly distributions by 3.5% to \$1.18 per unit on an annualized basis. In March of 2006, the REIT increased its monthly distributions by 3.4% to \$1.22 per unit on an annualized basis.

2. Distributable Income

Increasing distributions can be achieved prudently by increasing Distributable Income ("DI"), as defined in the Declaration. See "Distributable Income" below. In 2005, DI per unit (diluted) was \$1.339 per unit, up 2.2% from 2004. In the first quarter of 2006, DI per unit (diluted) was \$0.336, down 3.5% from the first quarter of 2005. The quarter-over-quarter decline was a result of lower leased area in the first quarter of 2006 (97.2% at quarter-end, as compared to 99.1% at the end of the first quarter of 2005). A significant portion of the incremental vacant space in the first quarter of 2006 was leased following the end of the quarter, bringing the REIT's leased area to 98.2%. See "Leasing Activity".

3. DI Pay-Out Ratio

To ensure it retains sufficient cash to meet its capital improvement and leasing objectives, the REIT will strive to maintain an appropriate DI pay-out ratio, the ratio of actual distributions to DI in a given period. In 2005, the REIT achieved a DI pay-out ratio of 87.9%. In the first quarter of 2006, the REIT achieved a DI pay-out ratio of 88.4%

4. Adjusted Funds From Operations

Increasing distributions cannot be achieved prudently without reference to adjusted funds from operations ("AFFO"), as this financial indicator takes account of maintenance capital expenditures and regular leasing expenditures while ignoring the impact of step-rent revenue. See "Adjusted Funds from Operations" below. In 2005, AFFO per unit (diluted) was \$1.217 per unit, up 8.8% from 2004. In the first quarter of 2006, AFFO per unit (diluted) was \$0.315, down 5.1% from the first quarter of 2005.

5. AFFO Pay-Out Ratio

To ensure it retains sufficient cash to meet its capital improvement and leasing objectives, the REIT will strive to maintain an appropriate AFFO pay-out ratio, the ratio of actual distributions to AFFO in a given

period. In 2005, the REIT achieved an AFFO pay-out ratio of 96.7%. In the first quarter of 2006, the REIT achieved an AFFO pay-out ratio of 94.1%.

6. Debt Ratio

Gross Book Value ("GBV") is defined as the book value of the assets of the REIT shown on the most recent balance sheet plus accumulated depreciation and amortization and an amount equal to the property management internalization expense recorded by the REIT in the year ended December 31, 2005. A conservative ratio of debt to GBV ("Debt Ratio") mitigates unitholder risk. At the end of 2005, the Debt Ratio was 51.0%. As at March 31, 2006, the Debt Ratio was 51.2%.

Operating Indicators

1. Tenant Retention and Replacement

The REIT places a high value on tenant retention, as the cost of retention is typically lower than the cost of securing new tenancies. If retention is neither possible nor desirable, the REIT will strive for high-quality replacement tenants. Leases representing 272,103 square feet of GLA mature in 2006. By the end of the first quarter of 2006, the REIT had renewed leases representing 172,524 square feet of this GLA and re-leased another 20,457 square feet of this GLA, representing 70.9% of the GLA covered by the maturing leases. It had also renewed leases representing 5,900 square feet of GLA maturing in 2007 and 32,719 square feet of GLA maturing in 2009.

2. Occupancy

The REIT strives to maintain consistently high levels of occupancy. At the end of 2005, the REIT's leased area was 97.0% (not including Properties Under Development). By the end of the first quarter of 2006, the REIT's leased area was 97.2% (not including Properties Under Development).

3. Same-Asset Net Operating Income

The REIT strives to maintain or increase same-asset net operating income over time. Same-asset refers to those properties that were owned and operated by the REIT for the entire period in question and for the same period in the prior year. Ignoring the step-rent revenue and the amortization of the fair value assigned to above-market and below-market rents with respect to acquired properties (the marked-to-market rent adjustment), same-asset net operating income was \$7,319 in the first quarter of 2006, up 1.4% from the same quarter in 2005.

4. Leasing Expenditures

The REIT monitors leasing expenditures carefully. 141,074 square feet of the GLA leased by the end of the first quarter of 2006 involved the renewal or replacement of leases that matured in the first quarter 2006. \$465 of the leasing expenditures incurred or committed to by the end of the first quarter of 2006 relate to this space. This represents \$3.30 per leased square foot.

5. Capital Expenditures

The REIT strives to maintain the properties in its portfolio in top physical condition. In the first quarter of 2006, the REIT incurred \$115 in maintenance capital expenditures. This represents \$0.05 per square foot of the REIT's portfolio at the outset of 2006.

Summary

The following table summarizes the key financial and operating performance indicators for the first quarter of 2006 and the first quarter of 2005, as well as the change between the two quarters.

	Q1 2006	Q1 2005	Change
Period-end distribution level per unit annualized	\$1.22	\$1.18	\$0.04
DI per unit (diluted)	\$0.336	\$0.348	(\$0.012)
DI pay-out ratio	88.4%	82.8%	5.6%
AFFO per unit (diluted)	\$0.315	\$0.332	(\$0.017)
AFFO pay-out ratio	94.1%	87.0%	7.1%
Debt Ratio	51.2%	50.0%	1.2%
Renewal/replacement % of leases maturing in year	70.9%	49.3%	21.6%
Period-end leased area (not including PUD)	97.2%	99.1%	(1.9%)
Same-asset net operating income	\$7,319	\$7,219	\$100
Leasing expenditures	\$465	\$292	\$173
Leasing expenditures per leased square foot	\$3.30	\$8.47	(\$5.17)
Maintenance capital expenditures	\$115	\$23	\$92
Maintenance capital expenditures per portfolio square foot	\$0.05	\$0.02	\$0.03

Business Environment and Outlook

The REIT's target market in downtown Toronto includes 14 million square feet of office inventory in three sub-markets, Downtown East (2.1 million square feet), Downtown West (10 million square feet) and King West (1.9 million square feet). Approximately half of office inventory in the Toronto target market falls within the Class I category.

The REIT's target market in downtown Montreal includes 13.3 million square feet of office inventory in three sub-markets, Downtown East (5.8 million square feet) and Old Montreal (7.5 million square feet). Over half of the office inventory in the Montreal target market falls within the Class I category.

The REIT's target market in downtown Winnipeg includes 1.8 million square feet of office inventory, principally in the Exchange District. Most of the office inventory in the Winnipeg target market falls within the Class I category.

The downtown Toronto office market strengthened in 2005, with the overall vacancy rate declining to 9.2% and the Class I category recording positive absorption of 257,946 square feet.¹ The strengthening continued into the first quarter of 2006, with the overall vacancy rate declining to 8.9% and the Class I category recording a very high level of positive absorption, 127,083 square feet.²

The downtown Montreal office market strengthened modestly in 2005, with the overall vacancy rate declining to 12.7% and the Old Montreal sub-market recording positive absorption of 15,215 square feet.³ This strengthening continued into the first quarter of 2006, with the overall vacancy rate declining to 11.6% and the Old Montreal sub-market recording positive absorption of 100,237 square feet.⁴

¹ Colliers International, *Greater Toronto Office Quarterly Update, Fourth Quarter 2005*.

² Colliers International, *Greater Toronto Office Quarterly Update, First Quarter 2006*.

³ Colliers International, *Greater Montreal Office Quarterly Update, Fourth Quarter 2005*.

⁴ Colliers International, *Greater Montreal Office Quarterly Update, First Quarter 2006*.

The Winnipeg office market was also stable in 2005, with a year-end vacancy rate of 7.8%.⁵ While Class I office space is not tracked separately in Winnipeg, Colliers International observed that “businesses continue to be lured to renovated historic buildings in the Exchange area in downtown Winnipeg.”⁶

Demand for office space in the REIT’s principal target markets is strengthening. This is particularly pronounced in the REIT’s Toronto target market, where overall occupancy levels and rent levels are expected to rise over the remainder of 2006.⁷ The state of the REIT’s target markets, the quality of the REIT’s portfolio and the capabilities of the REIT’s personnel afford Management a reasonable basis for confidence in the REIT’s near-term performance. The REIT intends to continue the acquisition of Class I and other office properties in its target markets.

AFFO per unit (diluted)	\$0.315	\$0.332	(\$0.017)	(5.1%)
AFFO pay-out ratio	94.1%	87.0%	7.1%	
Net operating income	9,133	7,219	1,914	26.5%
Same-asset net operating income	7,319	7,219	100	1.4%
Total assets	\$384,963	\$284,741	\$100,222	35.2%
Total debt (excludes premium on assumed debt)	\$212,226	\$147,418	\$64,808	44.0%
Debt to GBV	51.2%	50.0%	1.2%	
Total GLA (s.f., excluding PUD)	2,266	1,703	563	33.1%
Leased GLA (s.f., excluding PUD)	2,202	1,687	515	30.5%
Leased GLA (% total GLA)	97.2%	99.1%	(1.9%)	

Net income for the quarter ended March 31, 2006, was \$2,024, as compared to net income of \$2,498 in the quarter ended March 31, 2005. Net income per unit (diluted) for the quarter was \$0.126, as compared to net income per unit (diluted) of \$0.203 in the comparable quarter.

DI for the quarter ended March 31, 2006, increased by 25.6% to \$5,395 from \$4,297 for the quarter ended March 31, 2005. DI per unit (diluted) for the quarter was \$0.336, as compared to \$0.348 in the comparable quarter.

Net Rental Income

Net rental income for the quarter ended March 31, 2006, increased by 23.7% to \$9,400 from \$7,600 in the quarter ended March 31, 2005, as follows:

- (i) \$1,817 due to net rental income from properties not owned for the entire quarter and the entire comparable quarter;
- (ii) \$449 due to the internalization of the property management function; and
- (iii) offset by a \$466 decline in same-asset net rental income from properties owned for the entire quarter and the entire comparable quarter.

Net rental income per occupied square foot for the quarter ended March 31, 2006, was \$4.27 (\$17.08 annualized), as compared to \$4.51 (\$18.04 annualized) in the quarter ended March 31, 2005.

Real Estate Service Income

The Property Manager provides real estate services to third-party property owners. Real estate service income for the quarter ended March 31, 2006, was \$110, as compared to nil in the quarter ended March 31, 2005.

Property Management Internalization

The economic benefit of the property management internalization for the quarter ended March 31, 2006, is summarized in the following table:

(In thousands)	Q1 2006
Increase in net rental income	\$449
Real estate service income	110
Reduction in leasing expenditures payable as leasing fees	167
Reduction in capital expenditures payable as project management fees	12
Total	\$738

This is consistent with Management's expectations for the quarter.

Financing Expense

Financing expense includes interest cost on mortgage debt and other credit facilities and the amortization of the premiums and discounts on assumed mortgages. The amortization of the premiums and discounts on assumed mortgages reduced financing expense by \$42 in the quarter ended March 31, 2006.

Financing expense for the quarter ended March 31, 2006, increased by 31.4% to \$2,981 from \$2,269 in the quarter ended March 31, 2005, due to the increase in financing expense associated with additional properties acquired in 2005.

Depreciation and Amortization

The REIT records depreciation on its buildings on a straight-line basis over their expected life. Depreciation recorded on buildings for the quarter ended March 31, 2006, increased by 29.7% to \$1,776 from \$1,369 in the quarter ended March 31, 2005.

The REIT records amortization of deferred leasing cost, tenant improvements and the assigned fair value of the origination cost and tenant relationships for in-place leases acquired on acquisition of a rental

property on a straight-line basis over the term of the corresponding lease. Deferred financing cost is amortized on a straight-line basis over the term of the corresponding debt.

Trust Expense

Trust expense includes cost incurred by the REIT that is not directly attributable to rental property, such as officers' compensation, trustees' fees, professional fees for legal and audit services, trustees' and officers' insurance premiums and general administrative expenses.

Trust expense for the quarter ended March 31, 2005, increased by 4.2% to \$518 from \$497 in the quarter ended March 31, 2005, due to increased salary and occupancy costs.

Leasing Activity

Leasing activity as at March 31, 2006, is summarized in the following table:

	Vacant or Maturing	Leased End Q1	% Leased End Q1	Vacant End Q1*
Vacant GLA on January 1, 2006*	68,666	11,536	16%	57,130
Vacant GLA on acquisition in 2006	na	na	na	na
GLA accessed through rationalization	19,706	19,706	100%	-
GLA maturing in first quarter of 2006	147,808	141,074	95%	6,734
Subtotal	236,180	172,316	73%	63,864
GLA maturing in remainder of 2006	124,295	51,907	41%	na
GLA maturing in 2007		5,900		na
GLA maturing in 2009		32,719		na
Total		90,526		

*not including Properties Under Development

68,666 square feet of GLA were vacant at the beginning of 2006. By March 31, 2006, the REIT had leased 11,536 square feet of this originally vacant GLA, leaving 57,130 square feet vacant at the end of the quarter.

11,536 square feet of the originally vacant GLA leased in the first quarter was in the Balfour Building in Montreal. This space, along with another 19,706 square feet of GLA in the Balfour Building that the REIT gained access to in the first quarter of 2006, was leased to a single tenant for a term of 10 years commencing September 1, 2006.

Leases for 272,103 square feet of GLA mature in 2006, of which 147,808 square feet of GLA matured in the quarter ended March 31, 2006. By March 31, 2006, the REIT had

- (i) renewed or replaced leases for 141,074 square feet of the GLA that matured in the first quarter, leaving 6,734 square feet vacant at the end of the quarter,
- (ii) renewed or replaced leases for 51,907 square feet of the GLA maturing in the remainder of 2006,
- (iii) renewed leases representing 5,900 square feet of GLA maturing in 2007 and
- (iv) replaced a portion of a lease representing 32,719 square feet of GLA maturing in 2009.

Following the end of the first quarter, the REIT leased the 19,045 square feet of originally vacant GLA at 905 King Street West, Toronto, to a single tenant for a term of five years commencing May 1, 2006. This and other leasing activity following the end of the first quarter brought the REIT's leased area to 98.2%.

Capital Expenditures

The REIT's portfolio requires ongoing maintenance capital expenditures and leasing expenditures. Leasing expenditures include the cost of in-suite or base-building improvements made in connection with the leasing of vacant space or the renewal or replacement of tenants occupying space covered by maturing leases, as well as improvement allowances and commissions paid in connection with the

leasing of vacant space and the renewal or replacement of tenants occupying space covered by maturing leases.

In the quarter ended March 31, 2006, the REIT incurred \$115 in maintenance capital expenditures (\$0.05 per portfolio square foot) and incurred or committed to \$465 in leasing expenditures (\$3.30 per leased square foot) in connection with the renewal or replacement of leases that matured in the first quarter of 2006. (The REIT also committed to \$915 in leasing expenditures (\$8.87 per leased square foot) in connection with (i) the lease of originally vacant space that commences in the remainder of 2006 and (ii) the renewal or replacement of leases that mature in the remainder of 2006 or in 2007 or 2009.)

In the quarter ended March 31, 2006, the REIT incurred or committed to \$1,178 in revenue-enhancing capital expenditures in connection with base-building improvements to space that was significantly reconfigured to accommodate high-value new tenancies. The REIT also committed to \$492 in revenue-enhancing leasing expenditures in connection with the lease-up of space that was significantly reconfigured to accommodate high-value new tenancies.

Properties Under Development

Management believes that the Properties Under Development represent risk-appropriate opportunities to enhance DI per unit and create value for unitholders. Management also believes that the Properties Under Development represent an opportunity to capitalize more fully on the experience and expertise of the REIT's personnel.

The REIT acquired 145 Berkeley Street, Toronto, in November of 2005 at a cost of approximately \$125 per square foot. At that time, 20% of the GLA in the property was occupied. The REIT has since increased the occupancy to 64% and is working on completing the lease-up of the remaining GLA.

The REIT acquired QRC South in November of 2005 at a cost of approximately \$95 per square foot. The property is a brick-and-beam structure that extends south from Richmond Street East through to Lombard Street and has entrances from both streets connected along the north-south axis by an open corridor. The REIT is redeveloping and marketing the property as an annex to The Queen Richmond Centre, a Class I office complex acquired by the REIT in 2004 and known as QRC. (QRC is a brick-and-beam complex that extends south from Queen Street East through to Richmond Street East and has entrances from both streets connected along the north-south axis by an open corridor.) The construction phase at QRC South commenced in April of this year, and the re-leasing phase is expected to commence fully by mid-year.

Distributable Income

The REIT defines DI as the net income of the REIT determined in accordance with Canadian generally accepted accounting principles ("GAAP") adjusted by adding back or deducting as required:

- (i) depreciation on rental properties;
- (ii) amortization of the premiums or discounts on assumed mortgages;
- (iii) non-cash rental revenue recorded to recognize rental income rateably over the life of each lease;
- (iv) non-cash compensation expense with respect to the LTIP;
- (v) amortization of values ascribed in a building acquisition to in-place leases and tenant relationships;
- (vi) amortization of values ascribed in a building acquisition to above-market and below-market leases;
- (vii) amortization of values ascribed in the property management internalization to acquired contracts and customer relationships; and

(viii) property management internalization expense.

DI is a non-GAAP financial measure and should not be considered as an alternative to net income, cash flow from operations or any other measure prescribed under GAAP. The REIT considers DI to be a measure of its overall operating performance. Accordingly, DI is one of the REIT's key performance indicators.

Pursuant to the Ontario Securities Commission Revised CSA Staff Notice 52-306, the Commission recommends that distributable cash (which is synonymous with DI) be reconciled to cash flows from operating activities as presented in the consolidated financial statements. Set out below is this reconciliation.

(In thousands)	Q1 2006	Q1 2005
Cash from operating activities	\$5,086	\$3,249
Amortization of deferred leasing cost, tenant improvements and financing cost	(300)	(161)
Amortization of computer and office equipment	(8)	-
Change in non-cash operating items	617	1,209
Property management internalization expense	-	-
DI	\$5,395	\$4,297

Distributions for the quarter ended March 31, 2006, were \$4,768, representing a DI pay-out ratio of 88.4%, as compared to distributions for the quarter ended March 31, 2005, of \$3,557, representing a DI pay-out ratio of 82.8%.

Funds From Operations

Funds From Operations ("FFO") is a non-GAAP financial measure and should not be considered as an alternative to net income, cash flow from operations or any other measure prescribed under GAAP. The REIT considers FFO to be a measure of its overall operating performance, one for which there is a standardized definition. The following sets out FFO, calculated in accordance with recommendations of Real Property Association of Canada in its White Paper on Funds From Operations dated November 30, 2004.

(In thousands)	Q1 2006	Q1 2005
Net income	\$2,024	\$2,498
Amortization on rental properties	1,776	1,369
Amortization of deferred leasing cost and tenant improvements	233	113
Amortization of origination cost and acquired tenant relationships	1,880	806
FFO	\$5,913	\$4,786

Distributions for the quarter ended March 31, 2006, represented an FFO pay-out ratio of 80.6%, as compared to distributions for the quarter ended March 31, 2005, which represented an FFO pay-out ratio of 74.3%.

Adjusted Funds From Operations

AFFO is a non-GAAP financial measure and should not be considered as an alternative to net income, cash flow from operations or any other measure prescribed under GAAP. The REIT considers AFFO to be a measure of its overall operating performance, one that is becoming more widely used by Canadian real estate investment trusts. Accordingly, AFFO is one of the REIT's key performance indicators. The principal advantage of AFFO is that it starts from the standardized definition of FFO and takes account of maintenance capital expenditures and regular leasing expenditures while ignoring the impact of step-rent revenue. Because maintenance capital expenditures and regular leasing expenditures are not incurred evenly throughout a fiscal year, there can be volatility in AFFO on a quarterly basis. The following sets out AFFO, calculated in accordance with what Management believes to be industry practice.

(In thousands)	Q1 2006	Q1 2005
FFO	\$5,913	\$4,786
Step-rent adjustments	(355)	(405)
M-T-M acquired leases	88	24
Leasing expenditures	(465)	(292)
Maintenance capital expenditures	(115)	(23)
AFFO	5,066	\$4,090

Distributions for the quarter ended March 31, 2006, represented an AFFO pay-out ratio of 94.1%, as compared to distributions for the quarter ended March 31, 2005, which represented an AFFO pay-out ratio of 87.0%.

PART III

Financial Condition

The REIT finances its operations through three sources of capital: (i) mortgage debt secured by the REIT's rental properties, (ii) secured short-term debt financing with a Canadian chartered bank and (iii) equity. As at March 31, 2006, the REIT had mortgage debt of \$212,225, bank indebtedness of nil and unitholders' equity of \$154,647.

Unitholders' Equity

As at December 31, 2005, the REIT had a market capitalization of approximately \$271,521 based on a closing unit price of \$16.95 on the Toronto Stock Exchange. As at March 31, 2006, the REIT had a market capitalization of approximately \$302,005 based on a closing unit price of \$18.80 on the Toronto Stock Exchange.

In the quarter ended March 31, 2006, the REIT issued a total of 36,244 units for equity contributions of \$444. Costs incurred to issue the units were nil. Units were issued as follows:

- (i) 24,000 units at \$10.00 per unit for \$240 to certain officers and trustees who exercised options under the REIT's Unit Option Plan; and
- (ii) 12,244 units under its distribution re-investment plan at an average price of \$16.65 per unit for \$204.

The REIT adopted a Unit Option Plan at the time of its IPO and granted at that time options to the trustees and officers of the REIT to acquire 345,000 units at an exercise price of \$10.00 per unit prior to February 19, 2008. In 2004, the maximum number of units reserved for the Unit Option Plan was reduced from 604,390 units to 345,000 units. In 2004, 2005 and the quarter ended March 31, 2006, the trustees and officers of the REIT exercised 287,500 options in accordance with their terms. As at March 31, 2006, 57,500 options were outstanding, all of which had vested.

In May of 2004, the REIT adopted the LTIP whereby trustees and officers of the REIT ("Participants") may from time to time, at the discretion of the Trustees and subject to regulatory approval, subscribe for units at a market price established in accordance with the provisions of the LTIP. The price for the units is payable as to 5% upon issuance and as to the balance ("LTIP Loan") over 10 years with interest on the LTIP Loan at an annual rate established in accordance with the provisions of the LTIP. The units issued pursuant to the LTIP are registered in the name of a Custodian on behalf of the Participants who are the beneficial owners. The units are pledged to the REIT as security for payment of the LTIP Loan, and all distributions paid on the units are forwarded by the Custodian to the REIT and applied first on account of interest on the LTIP Loan and then to reduce the outstanding balance of the LTIP loans. The maximum number of units authorized for issuance under the LTIP is 259,390 units, of which 147,500 units were issued in 2004 and 76,224 in the year ended December 31, 2005.

A proposal will be placed before the Annual and Special Meeting of Unitholders on May 4, 2006, to increase the number of units authorized for issuance under the LTIP to an amount equal to 5% of the issued and outstanding units from time to time. If approved, after taking account of 137,069 units conditionally issued on January 31, 2006, 441,965 units will be authorized for issuance under the LTIP.

Mortgages Payable

Mortgages payable as at March 31, 2006, consisted of mortgage debt of \$212,225 and premium on mortgages assumed (net of accumulated amortization) of \$787.

GAAP requires that the mortgages payable assumed on acquisition of properties be recorded at fair value. The fair value of the mortgages payable has been determined by discounting the cash flows of these financial obligations using market rates for debt of similar terms and credit risks.

The following sets out the maturity schedule of the REIT's mortgage debt, together with the weighted average interest on the mortgages that mature in the respective year.

	Periodic Principal Payments	Balance Due at Maturity	Total Principal	% of Total Principal	Weighted Average Interest Rate of Maturing Mortgages
2006	\$ 4,248	\$ -	\$ 4,248	2.0%	na
2007	5,771	19,408	25,179	11.9%	6.44%
2008	5,087	14,404	19,491	9.2%	5.95%
2009	5,143	8,735	13,878	6.5%	6.84%
2010	5,373	1,926	7,299	3.4%	5.26%
Thereafter	24,738	117,392	142,130	67.0%	5.84%
Total	\$50,360	\$161,865	\$212,225		

Interest rates on the mortgage debt are between 4.94% and 8.10% with a weighted average interest rate of 5.97%. The weighted average term of the mortgage debt is 7.2 years.

Each individual mortgage loan of the REIT is secured by a mortgage registered on title of a rental property and by security agreements covering assignment of rents and personal property with respect to such property. The mortgage debt provides the holder with recourse to the assets of the REIT.

The REIT attempts to stagger the maturity of its mortgages and to have mortgages maturing each year to be in a position to upward finance the principal amount of maturing mortgages. Additionally, the REIT attempts to maintain 15 to 20% of its rental properties free from traditional long-term mortgage financing with a view to providing these assets as security for bank credit facilities.

Bank Credit Facilities

The REIT has a \$25,000 revolving credit facility with a Canadian chartered bank bearing interest at bank prime plus 1.0% and maturing on May 31, 2006. The REIT is working toward extending the term of the credit facility and anticipates no difficulty in that regard. The credit facility is secured by subordinated mortgage charges, first mortgage charges and security agreements on certain of the REIT's rental properties. In the quarter ended March 31, 2006, the average borrowings under the credit facility were \$656. As at March 31, 2006, the borrowings under the credit facility were nil.

Liquidity and Commitments

Net operating income generated from the rental properties is the primary source of liquidity to fund the REIT's financing expense, trust expense and distributions to unitholders. The Declaration requires the REIT to declare distributions each year not less than the greater of (i) 75% of its DI or (ii) an amount to ensure that the REIT will not be subject to tax on its income and capital gains. The REIT intends to pay distributions of approximately 85% to 90% of DI.

The REIT expects that increased financing on maturing mortgages will provide sufficient cash flow to fund mortgage repayments. The REIT plans to fund anticipated ongoing commitments, obligations, capital expenditures and leasing expenditures using cash flow from operations retained by the REIT and through available borrowing capacity under the credit facility.

The credit facility, new mortgage financing and the access to the public equity markets will provide the necessary capital the REIT requires for acquisitions. The REIT's acquisition capacity, meaning the ability of the REIT to acquire rental properties using un-utilized borrowing capacity while not exceeding the 60% Debt Ratio, is \$85,000.

As at March 31, 2006, the REIT had future commitments as set out below.

(In thousands)	March 31, 2006
Leasing commissions	\$931
Tenant inducements	781
Revenue-enhancing capital expenditure and building renovations	1,365
Revenue-enhancing leasing expenditure	492
Properties Under Development	583
Expenses	351
Total	\$4,503

PART IV

Summary Quarterly Information and Performance

The following sets out summary information and financial results for the most recently completed fiscal quarters.

(In thousands except for per unit and % amounts)	Q1 2006	Q4 2005	Q3 2005	Q2 2005	Q1 2005	Q4 2004	Q3 2004	Q2 2004
Revenue from rental properties	\$14,943	\$14,291	\$12,822	\$12,260	\$11,797	\$10,119	\$9,734	\$7,933

PART V

Critical Accounting Estimates

The significant accounting policies used in preparing the REIT's consolidated financial statements are described in Note 3 to those statements. The following is a discussion of Management's estimates that are most important to the presentation of the REIT's results of operations and financial condition and are most subjective as a result of matters that are inherently uncertain.

Fair Value of Assumed Mortgages Payable and Fair Value of Mortgages Payable

Most of the mortgage indebtedness of the REIT was assumed in conjunction with rental property acquisitions. GAAP requires that the mortgages payable assumed on acquisition of properties be recorded at fair value. The fair value of the mortgages payable has been determined by discounting the cash flows of these financial obligations using market rates for debt of similar terms and credit risks. Market rates for debt are based on the yield of Canadian government bonds with similar maturity dates plus a credit spread based on Management's experience in obtaining financing and the current market conditions.

Impairment of Assets

The REIT is required to write down to fair value any long-life assets that are determined to have been permanently impaired. The REIT's long-life assets consist of rental properties. The REIT's policy is to assess any potential impairment by making a comparison of the current and projected operating cash flow of a rental property over its remaining useful life, on an un-discounted basis, to the carrying amount of the rental property. If such carrying amount was in excess of the projected operating cash flow of the rental property, impairment in value would be recognized to adjust the carrying amount to its estimated fair market value. Current operating cash flows are based on leases in place and projected operating cash flows are based on Management's estimates of future rental rates. Prior to acquiring a rental property, the REIT commissions an appraisal and conducts due-diligence to satisfy itself that the acquisition price is representative of fair market value.

Depreciation

A significant portion of the purchase price of rental properties is allocated to buildings. The depreciation recorded on buildings is based on the straight-line basis over their expected useful life. The allocation of purchase price to buildings and the estimated useful life are based on Management's estimates and, if these estimates prove incorrect, the depreciation will not be appropriately recorded.

PART VI

Related Party Transactions

At the time of its IPO, the REIT entered into an agreement (“Property Management Agreement”) with the Developer, a company owned in part and controlled by the President and CEO of the REIT and owned in part by the Executive Vice President of the REIT. Pursuant to the Property Management Agreement, the Developer provided property management and related services to the REIT. Effective July 1, 2005, the Property Manager, a wholly-owned subsidiary of the REIT, acquired the Developer’s property management business. Immediately prior to July 1, 2005, the Developer ceased to provide services to the REIT under the Property Management Agreement. Accordingly, the REIT made no payments to the Developer for property management and related services in the quarter ended March 31, 2006, as compared to payments of \$828 in the quarter ended March 31, 2005.

At the time of the REIT’s IPO, a subsidiary of the Developer leased 29,102 square feet of office space from the REIT pursuant to a lease expiring on September 30, 2010. Effective July 1, 2005, the REIT entered into a direct lease of this space with Loblaws Properties Limited for a term ending October 31, 2010, on the condition that the original indemnity of the Developer protecting the REIT from any revenue shortfall (on a cash basis) from the original lease remain in full force and effect.

PART VII

Risk and Uncertainties

There are certain risk factors inherent in the investment and ownership of real estate. Real estate investments are capital intensive, and success from real estate investments depends upon maintaining occupancy levels and rental income flows to generate acceptable returns. These success factors are dependent on general economic conditions and local real estate markets, demand for leased premises and competition from other available properties.

The REIT's portfolio is focused on a particular asset class in the two largest metropolitan real estate markets in Canada. This focus enables management to capitalize on certain economies of scale and competitive advantages that would not otherwise be available.

Financing and Interest Rate Risk

The REIT is subject to risk associated with debt financing. The availability of debt to re-finance existing and maturing loans and the cost of servicing such debt will influence the success of the REIT. In order to minimize risk associated with debt financing, the REIT will attempt to re-finance maturing loans with long-term fixed-rate debt and to stagger the maturities over time.

Interest rates on the REIT's mortgage debt are between 4.94% and 8.10% with a weighted average interest rate of 5.97%. The weighted average term of the REIT's mortgage debt is 7.2 years. As at March 31, 2006, the borrowings under the REIT's credit facilities were nil.

Credit Risk

The REIT is subject to credit risk. Credit risk arises from the possibility that tenants may not be able to fulfill their lease obligations. The REIT will strive to mitigate this risk by maintaining a diversified tenant-mix and limiting exposure to any single tenant. As at March 31, 2006, there were 271 tenants in the REIT's portfolio.

The following sets out the REIT's tenant-mix on the basis of percentage of rental revenue for the quarter ended March 31, 2006, and the year ended December 31, 2005.

Category	% of Rental Revenue Q1 2006	% of Rental Revenue 2005
Service and professional	35	34
Retail (head office and storefront)	18	20
Telecommunications and information technology	17	15
Media and entertainment	13	13
Financial services	12	12
Government	3	2
Other	2	4

The following sets out the percentage of rental revenue from the REIT's top-10 tenants by rental revenue for the quarter ended March 31, 2006, as well as the percentage of rental revenue from those tenants for the year ended December 31, 2005.

Tenant	% of Rental Revenue Q1 2006	% of Rental Revenue 2005
Desjardins	7.9	7.9
Cossette Communications	5.1	6.0
MTS Allstream	2.9	4.3
Publicis Toronto	2.9	3.2
St. Joseph Media	2.8	3.2
Algorithmics	2.4	2.7
Indigo Books & Music	2.0	2.4
Nelvana	2.0	2.3
Blast Radius	2.0	2.3
Veritprop	2.0	1.5

Lease Roll-Over Risk

The REIT is subject to lease roll-over risk. Lease roll-over risk arises from the possibility that the REIT may experience difficulty renewing or replacing tenants occupying space covered by leases that mature.

The REIT strives to stagger its lease maturity schedule so that it is not faced with a disproportionately large level of lease maturity in a given year.

97.2% of the GLA in the REIT's portfolio was leased as at March 31, 2006 (not including Properties Under Development). The following sets out the total GLA of the leases that mature during the period from January 1, 2006, to December 31, 2010, assuming tenants do not exercise renewal options, and the percentage of total GLA represented by the maturing leases.

Year Ended	Square Feet	% of Total GLA
December 31, 2006	272,103	11.7
December 31, 2007	285,999	12.3
December 31, 2008	180,062	7.8
December 31, 2009	355,653	10.4
December 31, 2010	240,614	5.4

Leases representing 70.9% of the GLA that matures in 2006 were renewed or replaced by March 31, 2006.

The weighted average term to maturity of the REIT's leases is five years.

Environmental Risk

As an owner of real property, the REIT is subject to various federal, provincial and municipal laws relating to environmental matters. Such laws provide that the REIT could be liable for the costs of removal of certain hazardous substances and remediation of certain hazardous locations. The failure to remove or remediate such substances or locations, if any, could adversely affect the REIT's ability to sell such real estate or to borrow using such real estate as collateral and could potentially also result in claims against the REIT. The REIT is not aware of any material non-compliance with environmental laws at any of the properties in its portfolio. The REIT is also not aware of any pending or threatened investigations or actions by environmental regulatory authorities in connection with any of the properties in its portfolio or any pending or threatened claims relating to environmental conditions at the properties in its portfolio.

PART VIII

Subsequent Events

On April 4, 2006, the REIT completed the acquisition of 4436-4450 Saint-Laurent Boulevard, an 82,613 square-foot Class I office property located in downtown Montreal, and 5,500 square feet of adjacent land that forms the southwest corner of Saint-Laurent and Boulevard Mount-Royal for an aggregate purchase price of \$11.2 million.

On April 10, 2006, the REIT announced, and on May 1, 2006, the REIT completed, the acquisition of 364 Richmond Street West, a 39,300 square-foot Class I office property located in downtown Toronto, for a purchase price of \$5.5 million.

PART IX
